

# LEADING **SAFETY** CULTURE

## Communication, Commitment & Empowering Employees

**Wednesday, November 8, 2017 1PM-5PM**

Hilton Columbus at Easton

**Sign up for this additional workshop presented before the OAIMA Annual Meeting.**

**Q4 Impact Group is pleased to present this program for fellow OAIMA members!**

Q4 Trainers have held Senior Management, Operations and Sales positions in the Aggregates and Industrial Minerals Industries. We've experienced this important shift in safety culture at operations across the country and understand the challenges. We also know how to train. That's how we roll.

No sitting in front of a boring PowerPoint lecture! Our program is interactive. Together we will share ideas and experiences and have opportunities to network with like-minded folks. You're going to have fun, you're going to learn something, and we are confident that you're going to make a positive impact on your safety culture.

**How does your safety culture perform at your operations?**

**Tired of just being reactive?**

**Is your focus only on statistics and compliance?**

**Do you want every member of your team to OWN safety?**

**Are you ready to take your safety program to the next level?**

This workshop will explore what it takes to shift to a successful **behavior based safety culture**. We will discuss the changing workforce, communication strategies, coaching and leadership techniques. And ultimately, how to **empower every employee to embrace safety** as a condition of employment. We will work in small groups to explore the industry's past, present, and future safety culture and share roadblocks we've experienced on our journey. Participants will be inspired by the conversation and take lessons learned back to their operations to empower every employee to be a safety leader.
