Bylaws and Constitution

ARTICLE I -

Name, Location and Objective

Section 1. The Ohio Aggregates Association shall do business as the Ohio Aggregates & Industrial Minerals Association ("OAIMA").

Section 2. The principal office of the OAIMA, unless otherwise determined by the Board of Directors (the "Board"), shall be in the Greater Columbus, Ohio area.

Section 3. Mission Statement:

The OAIMA shall:

- Represent all Ohio industrial minerals industries;
- Promote OAIMA's members' interests in the public and private sectors;
- Promote responsible regulatory compliance;
- Provide timely education, training, and communications; and
- Meet the evolving needs of OAIMA's membership.

In general, the OAIMA shall perform such acts and services for its members where industry, rather than individual, action is more effective.

ARTICLE II - Membership

Section 1. Any person, firm or corporation engaged in the production and/or sales of industrial minerals in the United States shall be eligible for membership as an Active Member in the OAIMA, subject to the approval of the Board.

Section 2. Any person, firm or corporation engaged in the manufacture or sale of equipment, materials or services used by the industrial minerals industry, or in the publication of trade, technical or other journals of interest to the industrial minerals industry, or members of technical and professional societies and orga-

nizations interested in the industrial minerals industry, shall be eligible for membership as an Associate Member in the OAIMA, subject to the approval of the Board.

Section 3. The Board shall have the power to prescribe rules and regulations for the admission of new members, which rules and regulations shall not be in conflict with the provisions of these By-Laws.

Section 4. Distinguished Life Membership: A Distinguished Life Member must be an individual who is a former officer, director, committee chair or committee member of the OAIMA, no longer associated with any member in recognition of the individual's past services to the OAIMA. Nomination for Distinguished Life Membership shall be initiated by the Board and must be approved by at least a four-fifths vote of the Board present at a regular meeting of the Board or at a special meeting called for the purpose of considering such a nomination. Distinguished Life Members are not entitled to membership privileges.

ARTICLE III - Budget

Section 1. Dues for both Active and Associate members shall be determined by the Board and shall be based on the financial needs of the OAIMA.

Section 2. Annually, the Board shall adopt a budget covering activities of the OAIMA for the ensuing fiscal year. The fiscal year shall be established by the Board.

ARTICLE IV - Meeting of Members

Section 1. There shall be at least one meeting of the membership of the OAIMA each calendar year. The Board shall fix the date and place of such meeting. The call of the meeting, stating the place and date thereof, shall be given to Active Members at least thirty (30) days prior thereto.

Section 2. Special meetings of the Active Members shall be called by the President upon request of a majority of the Active Members of the Board. The request shall specify the object of the special meeting, shall be given to the Executive Director, and notice given to Active Members at least twenty (20) days prior to the date of such meeting.

Section 3. At all duly called meetings of membership, Active Members shall be entitled to one vote, in person or by proxy (in person or in writing). Associate Members shall have the privilege of the floor, shall be entitled to enter into discussion of any question at an annual meeting or special meeting, but they shall not have the right to vote.

Section 4. At all duly called membership meetings, a quorum shall consist of 25 percent of Active Members present in person, or by proxy, who shall have the power by majority vote to act upon all matters properly before the meeting.

ARTICLE V - Directors

Section 1. The Board shall consist of Thirteen (13) Directors affiliated with Active Members and two (2) Directors affiliated with Associate Members. To the extent that it is feasible, Directors shall be geographically distributed and shall be fairly representative of the Active Members. In no case shall one Active Member or its affiliates have more than one seat on the Board.

Section 2. The Board shall consist of the following:

- (a) **Nine (9) Directors** to be elected by the Active Members for a period of three (3) years, on staggered terms.
- (b) **Four (4) Directors** consisting of the active President, First Vice President, Second Vice President and Immediate Past President of the Association.
- (c) **Two (2) Directors** to be elected by the Associate Members for a period of two (2) years, staggered terms. Ballots will be transmitted thirty (30) days prior to annual meeting. The results of the election shall be announced at annual meeting.

Any action by the Board shall be by majority vote, unless otherwise specified by these By-Laws. Failure to obtain a majority vote on any Board action shall mean that the measure did not pass.

Section 3. All Active Member Directors shall be eligible to serve two (2) successive terms but shall not be eligible for re-election until one (1) year after the end of the second term.

Section 4. The Board shall have the power to fill all vacancies occurring in the Active Member Directors, among the Executive

Committee, and among the officers, caused by death, inability to act or resignation. Such vacancies shall be filled by a vote of the majority of the Active Members of the Board and such election shall be deemed to be only for the balance of the unexpired term. Directors appointed to fill a vacancy are eligible for two successive terms in addition to serving out the vacant term.

Section 5. The Board shall hold no fewer than two meetings each year, the time and place of such meetings to be determined by the Board. Special meetings of the Board may be called at any time, or shall be called by the President upon the request of fifty (50) percent of the Directors, but in either case, upon due notice as hereinafter provided.

Section 6. At any meeting of the Board, one-third of the Directors must be present in person, or by proxy in person (mail proxies are not allowed), to constitute a quorum for the transaction of business.

Section 7. Due notice, as used in this Article V, means notice at least ten (10) business days, prior to the meeting. Actual attendance at such meeting, or a waiver of notice before or after such meetings, shall be deemed to satisfy the requirements for due notice.

ARTICLE VI - Executive Committee

Section 1. The President, First Vice-President, Second Vice-President and the Immediate Past-President of the OAIMA shall constitute the Executive Committee.

Section 2. At any meeting of the Executive Committee, action shall be by a majority. Three (3) members shall constitute a quorum and members may participate and vote in person, by phone or by electronic media.

Section 3. The Executive Committee shall meet at the call of the President or upon request to the President by a majority of the Executive Committee.

ARTICLE VII - Administration

Section 1. The Executive Committee shall have and exercise the powers of the Board between the meetings of the Board, subject to any prior limitations established by the Board. All action of the Executive Committee shall be reported at the next meeting of the Board and shall be deemed ratified unless the Board acts otherwise.

Section 2. The President shall have the right, whenever in his judgement the circumstances require immediate action, to submit questions involving OAIMA policy to the Directors or to the Executive Committee. The results of such request shall have the full force and effect of a formal consideration at any regularly called meeting of the Board.

Section 3. As used in this Constitution and By-Laws, any notice, ballot, or question to be presented to the Membership may be given by regular U.S. Mail, electronic mail, or facsimile. "Membership" or "Member" means any Active Member or Associate Member as the context requires.

ARTICLE VIII - Officers

Section 1. Officers of OAIMA shall consist of the President, First Vice-President, and Second Vice-President. Officers shall be elected by the Active Members at the annual meeting and shall hold office for one year beginning upon adjournment of the annual meeting, so electing them and ending upon the adjournment of the annual meeting of the next succeeding year, or until their successors shall have been duly elected. Officers shall have had previous Board experience. Officers are eligible to hold office for two consecutive terms.

Section 2. The President shall preside at all meetings of the Board, the Executive Committee, and of the membership. The President shall appoint, subject to the approval of the Board, committees of the OAIMA. The President shall be an ex-officio member of all committees except the Committee on Nominations. The President shall perform such other duties as may be delegated to him by the Board or by the Executive Committee.

Section 3. The Vice President, in the absence or disability of the President, shall act for the President with the full authority granted in Section 2 hereof.

Section 4. The Treasurer shall be appointed by the Executive Committee and confirmed by the Board. The Treasurer shall participate in the annual budget conference and review the annual audit report. Treasurer shall assume a major role in financial discussions at meetings of the Board and Executive Committee and shall provide to the Board, as requested, an accounting of the finances of OAIMA. The Treasurer shall serve at the pleasure of the Board.

Section 5. The Board shall appoint an Executive Director who shall be the principal executive officer of the OAIMA. The Board may authorize the appointment of such other staff personnel as is necessary to transact business. Compensation for the staff shall be determined by the Board upon the advice and recommendation of the Executive Committee.

Section 6. In addition to other duties, the Executive Director shall be responsible, with appropriate staff assistance, for recording and preparing the minutes of all meetings of the members, the Board, the Executive Committee, and the committees and sub-committees. The Executive Director shall be responsible for signing all checks and may delegate this duty to the Treasurer and staff as authorized by the Board. All staff shall be bonded at the expense of OAIMA.

Section 7. Members of the Board, the Executive Committee, committees and sub-committees, and Officers shall serve without compensation.

WORLD CLASS MILLWRIGHT and INDUSTRIAL SERVICES
MSHA 46, 48 and OSHA CERTIFIED

Elmco Industrial Services
1171 Grill Rd.
Van Wert, Ohio 45891
419-238-1100 Office
www.elmcoindustrialservices.com

- **Removal, Installation, Maintenance, and Repairs of all Aggregate Systems**
- **Fabrication and Installation of Safety Equipment**
- **On-Site or In-Shop Welding, Fabrication, and Heavy Rigging, Lifting, Erection, and Installations**

Located in Van Wert, Ohio, Elmco Industrial Services has been providing a wide array of industrial and commercial services since 1998. Over the years, the family owned and operated company has continued to grow and expand with the addition of millwright services in 2003.

**ARTICLE IX -
Committee on Nominations**

Section 1. The Committee on Nominations shall consist of three (3) Directors, appointed by the President, with the advice and consent of the Board. The Committee shall by majority vote select a chairman.

Section 2. The Committee shall submit nominations to the Membership at least thirty (30) days before the annual meeting for three (3) Directors for election at the annual meeting. Committee shall also submit nominations for three (3) officers to be elected at the business meeting of OAIMA at the annual meeting. In making these nominations, the Committee shall observe the guidelines set forth in Article V, Section 1.

Section 3. At least thirty (30) days prior to the annual meeting, the Associate Members shall submit Associate Member name(s) to be placed in nomination for election of the Associate Director. Ballots will be provided within (15) fifteen days of the Annual Meeting with the results of the election to be announced at the annual meeting.

**ARTICLE X -
Parliamentary Procedure**

Section 1. Roberts' Rules of Order, Revised, shall be the standard authority for the conduct of all meetings.

**ARTICLE XI -
Amendments**

Section 1. This Constitution and these By-Laws may be amended at any meeting of the membership by a vote of two-thirds of the Active Members present and voting. Notice of any proposed amendment shall be furnished to the membership in writing at least thirty (30) days before the meeting at which such amendment is to be voted upon.

**ARTICLE XII -
Status of Assets and Liabilities**

The disclosed assets and liabilities of the OAIMA as originally constituted shall be and remain the assets and liabilities of the Association as re-constituted by the Adoption of this Amended Constitution and of these Amended By-Laws.

**ARTICLE XIII –
Committees**

Section 1. Standing and special committees may be established by the Board or by the President with the consent of the Board, at any time with specified authority and responsibilities.

Section 2. The Board may appoint from the membership task groups for the purpose of dealing with uncommon situations. Such groups shall report back to the Board with recommendations, if any, for appropriate Board action.

BOWSER-MORNER

Trusted Service. Satisfied Clients.

You need timely, accurate results from a laboratory you can trust. Bowser-Morner's skilled, experienced geologists, engineers and technicians, as well as our AASHTO ISO/IEC 17025 accredited testing laboratories have delivered for over 100 years.

Consulting Geology

Aggregate & Mineral Exploration with Sonic and Wireline Rock Coring

Limestone Physical & Chemical Analyses

- ASTM C25, Elemental Analyses by "Wet Method", CCE, LOI, Reactivity, Available Lime Index, etc.
- ASTM C1271, Elemental Analyses by "X-ray Spectrometric"
- ASTM C1301, Elemental Analyses by "ICP and AA Spectroscopy"
- ASTM C 110, Physical Analyses including Particle Size, Insoluble Residue, Bulk Density, Specific Gravity

Physical Testing of Mineral Aggregates

- ASTM C 33 Quality Analyses including soundness, abrasion, gradation, light weight particles, etc.
- ASTM C 227, C 289, C 1260, C 1567, C 1293 Alkali Silica Reactivity Analyses (ASR)
- ASTM C 586, C 1105 Alkali Carbonate Analyses (ACR)
- ASTM C 295 Aggregates Petrography
- ASTM C 666, Procedures A & B, Freeze Thaw Durability, Including Sonic Modulus, ASTM C 215

**AASHTO ISO/IEC 17025 Accredited – AMRL &
CCRL Inspected – US Army Corps of Engineers Validated**

Cell: (810) 869-0411

Air-Land Surveys, a ROWE Company, has a proven record of accomplishments with clients across the United States and Canada. Since 1967, Air-Land Surveys has been providing professional services including volumetric inventory mapping from aerial photography and land surveying, aerial digital topographic contour mapping, digital orthophotography and project management. Expanded services, including civil engineering, land surveying, landscape architecture and planning are available through our parent company ROWE Professional Services Company at any of their six (6) locations in Michigan and South Carolina.

Aerial photography and mapping support our client's requirements for high detail and timely photographic images of their properties, quarterly and annual inventory reporting for inventory management and tax reporting and site mapping for mining permits and planning.

Durex® wire cloth screens are the foundation for a full line of innovative screen products manufactured since 1965. Durex® wire cloth is made of high quality oil tempered, stainless, or high carbon steel, which offers long life, minimal downtime, and low cost per ton of production. In addition to high quality raw materials, Durex® uses advanced tooling and production machinery to assure accurate openings and tight weaves. The production personnel have the experience and knowledge needed to produce high quality, accurate, and long-lasting screen media. The high levels of accuracy and workmanship also extend to finishing the screen panels. Each Durex® wire screen panel is precisely sheared to the customer's specifications and hooked to match the customer's machine OEM specifications.

Our Products Include:

- Wire screens including square, slotted and triplesheet openings, Accuslot®, Livewire® Specialty Screens and Armor® screen media
- Perforated Plate
- Vibrating screen accessories including Channel Rubber, hold down bolts and donuts, steel clamp rails, tensioning wedge assemblies and skirt board rubber
- Wedge wire screens and modular wedge wire panels for competitor systems
- Modular wire cloth for competitor systems

CUSTOM INDUSTRIAL GEAR MANUFACTURING SINCE 1987

Our origins date back to 1987 when we first started making gears.

GearTec's knowledge base is deep in expertise with our machinists having 200+ years of combined experience. That's a rich history you can trust. Our Goal is to be the most responsive, price competitive and reliable global industrial gear manufacturer.

GearTec has traditionally been viewed as a job shop and one-off specialist. However, driven by new leadership and bolstered by new equipment we are now doing higher volume work for capital equipment jobs. A natural extension of our gearing has grown into more non-gear turning, machining, and assembly work as well. Of course, we continue to excel at industrial gear repair, replacement, service and small-run jobs.

Contact: Jim Bibler, Technical Development Manager

Email: jbibler@gilsonco.com

In 1939, Gilson introduced our Testing Screen to the Mining and Highway Construction industry in response to its demands for greater control of material quality. Eighty years later, our Testing Screen still remains the center piece in most material testing labs and our sieve shakers, test sieves, and sample splitters are found in facilities throughout the world.

Gilson Company, Inc. is a 3rd generation, family owned company, and has grown its reputation to be recognized for superior expertise, innovation, and development of particle sizing, sample reduction, and construction materials testing equipment.

Our highly-trained and experienced Customer Service and Technical staff have allowed us to expand and support one of the largest selections of material testing equipment used in asphalt, concrete, aggregate and soil testing industries. In addition, we offer a wide variety of general laboratory equipment such as ovens, balances, and thermometers in our annual catalog and on our website. This allows our customers to find everything they need in one place. Our goal is to exceed your expectations, our method of achieving our goal; Integrity, Customer Service, Quality, Innovation, Selection, Expertise and Price.

Hill International, Inc. (Hill) is an international construction consulting firm that provides program and project management, construction management, cost engineering and estimating, quality assurance, inspection, scheduling, risk management and claims avoidance to clients involved in major construction projects worldwide. Hill has participated in more than 10,000 project assignments with a total construction value of more than \$500 billion, and is ranked as the 8th largest construction management firm in the United States according to Engineering News-Record magazine.

With offices in Columbus, Cleveland and Toledo, Hill maintains a strong presence in Ohio. Hill has successfully delivered projects for key clients, including new and rebuilt roadways and bridges for the Ohio Department of Transportation (ODOT), the Ohio Turnpike Commission (OTC) third-lane additions and base-replacements and capital improvement projects for the Ohio Department of Natural Resources. In addition to completing numerous public works projects for cities and counties across the state, Hill has partnered with the Ohio Facilities Construction Commission (OFCC) to manage construction for schools and maintenance facilities. Other notable projects comprise Columbus Regional Airport and Mt. Carmel Health Network staff augmentation services, as well as the General Services Administration (GSA) courthouse and office facilities.

Stationary and portable processing plants, plant additions, belt conveyors and radial stackers are designed and fabricated in our 110,000 square foot manufacturing facility. We lead the industry in providing high quality processing plants and equipment that offer turn-key solutions to our customers. Our innovative staff of Project Managers, Design Engineers and MSHA certified Field Construction and Service crews will provide high quality solutions from big to small projects.

Product Support offers a full line of parts and service support, complete rebuild and repair services, installation, start-up and maintenance training. Highly experienced and MSHA trained Field Service Techs. Full line of conveyor components, processing equipment wear parts, wear castings, idlers and media. Portable plants for rent or purchase.

Authorized Distributor for:

Breaker Technology, Inc

Boom and Breakers for stationary and portable plants

Deister Machine Co

Vibrating screens and feeders

Dings Magnetic Group/Advanced Detection Systems

Industrial and mining magnets and metal detectors for aggregates & mining.

Dodge Pulleys and Power Transmission Components

DSI Dust Solutions, Inc.

Dust suppression systems to meet or exceed EPA and state air standards;
Wheel wash systems

PROCESS MACHINERY, INC.(Continued)

Eagle Iron Works

Log washers, Coarse and Fine Material Washers, Sand screws, Classifying tanks, Blade mills, Clay crushers, specialty mixers, Pug mills.

Impact Service Corporation®

Stationary and portable vertical shaft impact crushers; VSI conversions, upgrades, and parts.

Luff Industries

Conveyors Idlers, Standard and Heavy Duty Pulleys, Impact Beds, and Conveyor Components

Major Wire Industries

Flex-Mat 3™ high performance self-cleaning media, OptimumWire™ woven tempered and stainless steel wire cloth for the quarry, mining, asphalt, recycling, coal and industrial markets.

MASABA Mining Equipment

Telescoping Stackers, Portable Truck Unloaders, and Portable Crushing and Screening Plants

McLanahan Corporation

Aggregate processing systems, washing equipment, fines recovery, and lignite removal. Fines Recovery Systems, and Lignite Removal Systems.

Metso Minerals

Primary jaw crushers, impactors, gyratory crushers; secondary and tertiary HP cones; LT track mounted crushing and screening plants; Mobile screening and crushing plants; wear parts and components

Polydeck Screen Corporation

Synthetic urethane and rubber screen panels for scalping screens and dry and wet sizing screens for the aggregate and mining industries. Bolt down rubber liners.

Schurco Slurry Pumps

Horizontal and vertical slurry pumps. For handling the toughest and most abrasive applications.

Surestrike International Inc

Mechanical impact hammers that effectively break oversize material and demolish concrete without the use of drop balls or hydraulic hammers.

Trellex

Rubber and urethane wear liners. Dust enclosures for vibrating screens. Wire cloth and urethane screen media.

Contact: Hank Davis

Quality Magnetite, LLC is the leader in our industry. We globally source, process, and distribute magnetite, a type of iron oxide that possesses natural magnetic properties (chemical formula Fe_3O_4). It is our purpose and privilege to serve our clients in the coal, aggregate, and various other industries, around the world.

We provide the highest product and service quality that our customers require. What we offer improves productivity by reducing waste, minimizing operational challenges, maximizing use of resources, and optimizing cost savings, by applying our knowledge and technology to meet our customers production challenges.

To stay on top of our industry, Quality Magnetite responsibly operates and grows our business by always recognizing that Service Matters, Quality Counts, and Safety is Foremost. Our leadership is accountable for maintaining these principles and advocates them in the company's Mission, Values, and Vision statements.

Stedman Machine Company is a U.S.-based manufacturer of industry-leading, premium impact-style crushers for the Aggregate industry. We listen to our customers and develop custom solutions for their unique size reduction and processing problems. We help customers validate substantial plant equipment investments. From the sales process throughout the long operating lifespan, we are business partners supporting those who own our equipment and the Aggregates industry.

Stedman's line of equipment includes: the Mega-Slam™ primary HSI up to 1200 TPH, Grand-Slam™ secondary HSI up to 1600 TPH, V-Slam™ vertical shaft impactor coarse to fine up to 250 TPH, Cage Mills for coarse, medium-fine, & fine grinding, as well as parts & services for after-sales support.

Stedman also provides dry material systems engineering and expertise in a variety of areas, including: crushing, screening, structures, conveyors, chutes, hoppers, dust collection, and storage.
